

## TEMPORARY TRAFFIC REGULATION ORDER NOTICES

Findon Parish Council would like to confirm that these works are part of the village enhancement scheme (Traffic, Environment, and People) that is being implemented by WSCC Improvements.

The locations are the gateway entry points into the village, which we are looking to enhance. WSCC Highways have advised that each location will be worked on separately so that access is maintained from the other routes into Findon and there will be signs diverting traffic to these routes. As Findon Parish Council did not want the high friction surfacing to be laid at these locations, there will only be road markings going in and as a result the closure time at each location will be reduced considerably. All traffic should adhere to the signed diversions in place which should mean that there will be very minimal disruption during this time.

There will be work in The Square, where imprint surfacing (to the sides of the High Street, School Hill, Cross Lane cross road) and road markings will be laid, with traffic being directed around, where required. The contractor will have signs up warning road users and affected frontages will receive a letter informing of the works.
